

MERVIN TEE

During my postgraduate studies in NUS, I've discovered that my passion and strength still lies in research. Coupled with frequent engagements on public health and social work topics, it further built my interest towards public health research.

Currently, I am searching for a research position where I could further grow my research skills and knowledge. At the same time, contribute with the current skills and knowledge that I have.

EDUCATION

- 2021 | 2020**
 - **Data Science Specialisation**
